SAFETY: All walkers are encouraged to also be decorated with battery powered lights during the parade. Hold a safety meeting with the float staff early. Be prepared, identify the hazards and plan your strategy should an unexpected event occur. Identify the location of the fire extinguisher and how to shut off the generator and other electrical equipment. Identify a method to alert the driver to stop the parade float.

GENERATORS: We encourage all parade entries to have illuminated items and lots of them! All electrical devices must have sufficient capacity for the use intended on the float/entry. Wiring should be properly secured to the float. Portable generators used in conjunction with float lighting must be securely mounted on a vehicle or other base. A minimum of 12 inches of clearance should separate any part of the generator from light and combustible materials, including decorations. Avoid refueling by planning ahead and filling the gas tank prior to the event.
